I certify that I hunted or acquired this trophy in an ethical, lawful, fair-chase manner, and according to Rowland Ward Ltd.'s Guiding Principles.

Signature _____ (Official Use Only _____)

Method 8

African Spiral-Horned Antelopes (Giant eland, typical eland, bongo, sitatunga, bushbuck, typical nyala, mountain nyala, greater kudu, lesser kudu), Addax, and Blackbuck

- Length:** Measure around the spiral, keeping the tape on top of the spiral ridge. Start at the base, find the lowest point of the front ridge, and proceed to tip. When spiral ridge ends, proceed in straight line to tip; do not continue to spiral. **(L)**
- Circumference:** Measure circumference parallel to base of the horn. **(C)** **Elands** and **greater kudus** have hard-to-measure bases, so take care to **(1)** ensure a continuous loop with the tape, **(2)** do not depress tape into valleys or deep grooves, and **(3)** do not weave the tape along the edge of the base.
- Tip-to-Tip Spread:** Measure the spread. **(E)**

Comments (Note trophy repairs, remeasuring, and so on, here):

Species _____ Owner _____
